(Incorporated in Malaysia)

UNAUDITED PILLAR 3 DISCLOSURE 30 SEPTEMBER 2025

1. Overview

The Pillar 3 Disclosure for financial reporting beginning 1 January 2010 was introduced under the Bank Negara Malaysia's Risk-Weighted Capital Adequacy Framework ("RWCAF"), which is the equivalent to Basel II issued by the Basel Committee on Banking Supervision. Basel II consists of 3 Pillars as follows:

- (a) Pillar 1 outlines the minimum amount of regulatory capital that banking institutions must hold against credit, market and operational risks assumed.
- (b) Pillar 2 focuses on strengthening the supervisory review process in developing more rigorous risk management framework and techniques. The purpose is for banking institutions to implement an effective and rigorous internal capital adequacy assessment process that commensurate with the risk profile and business plans of the Bank.
- (c) Pillar 3 sets out the minimum disclosure requirements of information on the risk management practices and capital adequacy of banking institution, aimed to enhance comparability amongst banking institutions.

The approaches adopted by Sumitomo Mitsui Banking Corporation Malaysia Berhad ("the Bank"), are shown in the table below:

Risk type	Approach adopted	Capital requirement assessment
Credit	Standardised Approach	Standard risk weights
Market	Standardised Approach	Standard risk weights
Operational	Business Indicator Component*	Business Indicator Component and Internal Loss Multiplier

- * For 31 March 2025 report and onwards, in accordance with Bank Negara Malaysia's Revised Capital Adequacy Framework (Operational Risk), issued date on 15 December 2023 and effective date on 1 January 2025

The Bank's main business activity is commercial banking focusing on corporate banking, trade and treasury businesses. The Bank is also involved in Islamic banking business providing non-Malaysia Ringgit Islamic facilities via International Currency Business Unit ("ICBU") since March 2014 and Malaysia Ringgit Islamic facilities via Islamic Banking Window ("IBW") since January 2023, after securing Bank Negara Malaysia ("BNM") approval. During the financial period ended 30 September 2025, IBW offers Islamic financing products in Malaysian Ringgit and Japanese Yen to the customer.

UNAUDITED PILLAR 3 DISCLOSURE 30 SEPTEMBER 2025

2. Capital Management

The objective of the Bank's capital management policy is to maintain an adequate level of capital to support business growth strategies under an acceptable risk framework, and to meet its regulatory minimum capital requirements. The Bank's capital management process includes analysis of the risk appetite and the capital requirement for the business growth and periodical monitoring of capital adequacy ratios.

3. Capital Management Framework

The Bank has exposure to the following risks from its use of financial instruments:

- Credit risk
- Liquidity risk
- Market risk
- Operational risk

The Board of Directors has overall responsibility for the establishment and oversight of the Bank's risk management framework. The Board has established a Board Risk Management Committee ("BRMC"), which is responsible for developing the risk management policies and assessing the implementation of risk management by the management of the Bank. The Bank has also established a Risk Management Committee ("RMC") as one of the management committees to formulate the policies, procedures and risk limits and conduct periodical monitoring on risk exposure, risk portfolio and risk management activities.

3.1. Credit Risk

Credit risk is the risk of a financial loss to the Bank if a customer or counterparty to a financial instrument fails to meet its contractual obligations. The Bank's exposure to credit risk arises principally from loans, advances and financing to customers, placements with other banks, investment in debt securities, derivative financial assets and other receivables.

Credit Risk Management

Integral to the management of credit risk, the Bank has credit policies and procedures in place to identify, measure and manage credit risk. Whilst, the Bank continually monitors the exposure to credit risk on an on going basis and identify emerging risks to formulate appropriate mitigation actions.

The Bank monitors its credit concentration risk from a single counterparty exposure, large exposure or from other portfolio concentrations by setting an exposure limits on customers, customer group, industries, products, asset quality etc.

Credit evaluations are required to be performed on customers requiring credit by the business managers and credit analyst in the first line of defence function with independent risk assessment and approval roles in the second line of defence function which are clearly defined and segregated.

(Incorporated in Malaysia)

UNAUDITED PILLAR 3 DISCLOSURE 30 SEPTEMBER 2025

3.1. Credit Risk (continued)

Credit Risk Governance

The Bank has established Credit Committee as one of the management committees with the following objectives:

- (i) to review, analyse and endorse or approve credit proposal by ensuring approvals are granted within the Bank's risk appetite as well as effective credit limit control and monitoring; and
- (ii) the review and approvals are guided by credit policies and procedures which are reviewed periodically to ensure their continued relevance to the Bank's business strategy and the business environment.

The RMC conducts periodical monitoring on credit exposure trend, asset quality by obligor grading and its credit cost ratio in relation to the probability of default as well as default or impaired loans ratio, portfolio concentration analysis and credit related limits control such as single counterparty exposure limit, large loan limit, exposure to connected parties, product concentration limits and sectorial limits.

As at the end of the reporting period, the maximum exposure to credit risk arising from loans, advances and receivables are represented by the carrying amounts of cash and short-term funds, deposits and placements with banks and other financial institutions, debt instruments measured at FVOCI and loans, advances and financing and other receivables as shown in the statement of financial position.

The Bank has taken reasonable steps to ensure that loans, advances, investments and receivables that are neither past due nor impaired are stated at their realisable values. A significant portion of these loans, advances, investments and receivables are regular customers or counterparties that have been transacting with the Bank.

UNAUDITED PILLAR 3 DISCLOSURE 30 SEPTEMBER 2025

3.1. Credit Risk (continued)

Credit quality of gross loans, advances and financing

The Bank's ECL model takes account of the on and off-balance sheet credit exposures to sovereign, financial institutions and corporates. The credit exposures are categorised into three stages, defined as follows:

- Stage 1: Ordinary / Performing Credit Exposure (12-month ECL)
- Stage 2: Exposure with Significant Increase in Credit Risk (Lifetime ECL)
- Stage 3: Impaired Credit Exposure (Lifetime ECL)

The general and impairment provision of the credit exposures are equivalent to 12-month ECL or Lifetime ECL, depending on the stage of credit exposures applicable to each financial asset.

All gross loans, advances and financing are neither past due nor impaired as at the following reporting dates:

	30 September 2025 RM'000	31 March 2025 RM'000
At amortised cost:		
Overdraft	33,820	42,181
Term loans / financing		
- Syndicated loans / Syndicated Islamic financing	2,864,036	2,936,572
- Factoring receivables	235,406	48,014
- Other term loans / Islamic term financing	5,078,783	5,557,714
Trade bills discounted	13,080	4,598
Revolving credits / Revolving credit-i	4,768,321	4,969,922
Gross loans, advances and financing	<u>12,993,446</u>	<u>13,559,001</u>
Less: Allowance for ECL		
- 12-month ECL (Stage 1)	(7,257)	(4,915)
- Lifetime ECL not credit impaired (Stage 2)	(19,467)	(26,982)
- Lifetime ECL credit impaired (Stage 3)	(47,119)	(50,279)
Net loans, advances and financing	<u><u>12,919,603</u></u>	<u><u>13,476,825</u></u>

3.1. Credit Risk (continued)

Disclosure for portfolio under Standardised Approach

The Bank refers to the credit ratings assigned by credit rating agencies in its calculation of credit risk-weighted assets. The following are the External Credit Assessment Institutions ("ECAI") ratings used by the Bank and are recognised by BNM in the RWCAF:

- (a) Standard & Poor's Rating Services ("S & P")
- (b) Moody's Investors Service ("Moody's")
- (c) Fitch Ratings ("Fitch")
- (d) RAM Rating Services Berhad ("RAM")
- (e) Malaysian Rating Corporation Berhad ("MARC")
- (f) Rating and Investment Information, Inc. ("R&I")

The ECAI ratings accorded to the following counterparty exposure classes are used in the calculation of risk-weighted assets for capital adequacy purposes:

- (a) Sovereigns and Central Bank
- (b) Banking Institutions
- (c) Corporates

Rated and Unrated Counterparties

In general, the issue rating i.e. the rating specific to the credit exposure is used. When there is no specific rating available, the credit rating assigned to the issuer or counterparty of the particular credit exposure is used. In cases where an exposure has neither an issue or issuer rating, it is deemed as unrated.

Where a counterparty or an exposure is rated by more than one ECAI, all available external ratings of the counterparty will be captured and the following rules will be observed:

- Where 2 recognised external ratings are available, the lower rating is to be applied; or
- Where 3 or more recognised external ratings are available, the lower of the highest 2 ratings will be used for the capital adequacy calculation purposes.

UNAUDITED PILLAR 3 DISCLOSURE 30 SEPTEMBER 2025

3.1. Credit Risk (continued)

Credit Risk Mitigation

When extending credit, the Bank shall make reasonable credit judgment after confirming the credit standing and repayment/payment ability of the borrower/customer and does not grant credit facilities solely on the basis of the collateral provided. Credit facilities may be provided on an unsecured basis or with some credit supports depending on few common factors such as the strength of customer's credit standing, product type and/or the total counterparty exposures. Credit risk mitigation nevertheless is an important aspect of effective risk management in the Bank.

Collaterals taken by the Bank generally are cash, properties and corporate guarantees. At present, the Bank does not make use of credit derivative instruments and on and off-balance sheet netting in the bank's credit risk mitigation process. The netting arrangement will be considered on an as-and-when basis to minimise the Bank's risk exposures. Exposures arising from forex and derivatives are typically mitigated through agreements such as the International Swaps and Derivatives Association (ISDA) Master Agreements and the Credit Support Annex (CSA). Such agreements help to minimise credit exposure by allowing the Bank to offset what it owes to a counterparty against what is due from that counterparty in the event of default. The Bank has procedures to ensure that appropriate information is available to support the collateral process and to highlight counterparties that have not met their requirement for additional collateral to satisfy specified initial margin amount and variation margin threshold.

For calculating and assessing Net Credit Risk-Weighted Assets (RWA), the Bank takes into account eligible collaterals pledged with the Bank, that are primarily cash deposits. Collateral haircuts are applied when there is a currency mismatch between customer exposure and collaterals.

For collateral valuation and management, the Bank is guided by its credit policy and procedures. The collaterals legal enforceability are reviewed on yearly basis or as and when there are any changes to the relevant regulations.

(Incorporated in Malaysia)

UNAUDITED PILLAR 3 DISCLOSURE 30 SEPTEMBER 2025

3.1. Credit Risk (continued)

The CCR on derivative financial instruments is the risk that the Bank's counterparty in a foreign exchange, interest rate, options or credit derivative contract defaults prior to maturity date of the contract and the Bank has a claim on the counterparty at a relevant time. The Bank's financial loss is not the entire contracted principal value of the derivatives, but the Bank will only suffer a replacement cost if the contract carries a fair value gain at time of default.

The CCR is managed via the establishment of counterparty limits and also managed as part of the overall lending limits to banks and customers based on BNM's Single Counterparty Exposure Limit ("SCEL"). As the counterparty credit risk exposure fluctuates with market variables, counterparty credit risk is measured as the sum of mark-to-market (MTM) plus appropriate add-on factor for Potential Exposure (PE). The PE factor is an estimate of the maximum credit exposure over the remaining life of the foreign exchange (FX)/ derivative transactions and is used for limit setting estimation and internal risk management.

UNAUDITED PILLAR 3 DISCLOSURE 30 SEPTEMBER 2025

3.2. Liquidity Risk

Liquidity risk is the risk when the Bank fails to raise funds to meet the present or future demand of customers or counterparties at a reasonable cost. The potential liquidity risks of the Bank mainly include customers' premature and collective withdrawal, overdue payment of the debtors, mismatched asset-liability maturity structure and difficulties in realisation of assets. Liquidity risk management in SMBCMY followed the six process which is Identification, Assessment, Monitoring, Review, Control and Reporting.

No	Process	Description
1	Identification	Identify potential cash flow short fall.
2	Assessment	Assess cash flow short fall and build risk profile.
3	Monitoring	Observe the indicators that measure cash flow short fall.
4	Review	Review and challenge the liquidity risk management.
5	Control	Establish key control process and monitor effectiveness of control.
6	Reporting	Report on key risk indicators and remedial action to mitigate risk.

The primary tool used for monitoring liquidity is the Bank Negara Malaysia's Liquidity Coverage Ratio ("LCR") which required SMBCMY to maintain at least 100% on an ongoing basis. The LCR measured the adequacy of high quality liquid assets to withstand acute liquidity stress scenario over 30-day horizon. It is further supplemented with the internal liquidity risk management policies set by the Board of Directors and incorporated in the Market / Liquidity Risk Management policies and procedures. These policies ensure that the liquidity surpluses are within the limit. The Assets and Liabilities Management Committee ("ALCO") is responsible for the liquidity risk management. The liquidity risk management activities are carried out through active management of maturity profiles of assets and liabilities, diversification of the funding base and proactive management of the Bank's customer deposits. It also contained liquidity stress testing with market-wide, idiosyncratic and combined scenario to measure the bank position in stress period.

For the financial period ended 30 September 2025, the simple average of recent 12 month end LCRs increased by 9.40% mainly due to lower net cash outflow.

The LCR are as follows:

	30 September 2025	31 March 2025
Simple average of recent 12 months	195.68%	186.28%

SUMITOMO MITSUI BANKING CORPORATION MALAYSIA BERHAD

UNAUDITED PILLAR 3 DISCLOSURE 30 SEPTEMBER 2025

3.3. Market Risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and other prices that will affect the Bank's financial position or cash flows due to the revaluation of financial instruments categorised as trading items. The objective of market risk management is to manage and control market risk exposures within the predetermined limits which are in line with the risk appetite of the Bank.

The BRMC approves the Bank's market risk appetite taking account of market volatility, the range of traded products and assets classes, the business volumes and transaction sizes. Market risk appetite has remained broadly stable since 2011 and to date.

The BRMC is responsible for the limit setting at a business level. The BRMC is also responsible for policies and other standards for the control of market risk and overseeing their effective implementation. These policies cover both trading and non-trading books of the Bank.

All permanent limits are approved by the Board / BRMC prior to implementation. Exceptions are escalated to the Board / BRMC.

Interest rate risk management

Interest rate risk in market risk management refers to the changes in the present values of fixed income securities in the trading book and derivative instrument such as interest rate swap, currency swap and forward exchange rate contracts, as a result of changes in the levels of market interest rates. Bank's ALCO regularly reviews the interest rate outlook, assessed the vulnerability of present values of the trading book items and develops strategies to mitigate interest rate risk.

UNAUDITED PILLAR 3 DISCLOSURE**30 SEPTEMBER 2025****3.3. Market Risk (continued)****Foreign exchange risk management**

Foreign exchange risk arises from exchange rate movements, which affects the profit of the Bank from its foreign exchange open positions taken from time to time. This risk is principally managed by setting predetermined limits on open foreign exchange positions against these limits and the setting and monitoring of cut-loss mechanisms. To mitigate this risk the Bank's foreign exchange positions with customers are normally hedged with counter deals in the market and the Bank does not keep any large open currency positions. The Bank enters into foreign exchange related derivatives, namely spot and forward contracts, as part of its strategies to manage foreign exchange risk.

3.3. Market Risk (continued)

Interest Rate Risk in Banking Book

Interest rate risk is defined as the potential impact on the Bank's earnings (i.e. the net interest income) and the net assets value resulting from a change in interest rates.

Interest rate risk in banking book is managed through the Bank's ALCO, which meets on a monthly basis. The committee is responsible to study the sensitivity of the net interest income against the change in interest rates and subsequently, to determine the Bank's policy on balance sheet management. The committee also monitors the impact of the change in interest rates on the net assets value.

The primary tool used for monitoring the interest rate risk impact on the earnings is the re-pricing gap analysis. In this analysis, the re-price dates of rate sensitive assets are compared against the re-price dates of rate sensitive liabilities. A positive gap position indicates that more assets are available to be re-priced than liabilities; hence, an increase in the interest rates will positively impact the Bank's net interest income.

In addition to monitoring the assets and liabilities gap, the Bank also uses interest rate derivatives (i.e. interest rate swaps) to mitigate the interest rate risk impact on the earnings.

The primary tool used to monitor the interest rate risk impact on the net assets value is the basis point value ("BPV") analysis and economic value of equity ("EVE") analysis. The Bank's BPV positions are monitored on daily basis against the approved BPV limits as set by the Head Office based on recommendation by ALCO, whereas, the EVE is monitored and reported to ALCO on a monthly basis.

UNAUDITED PILLAR 3 DISCLOSURE
30 SEPTEMBER 2025

3.3. Market Risk (continued)**Interest Rate Risk in Banking Book (continued)**

The table below details the disclosure for interest rate risk in the banking book, the increase or decline in earnings and equity for upward and downward rate shocks which are consistent with shocks applied in simulation for measuring interest rate risk, broken down by various currencies, where relevant. Simulation is measured based on the banking book positions as at reporting date and does not take into account loans / financing and deposit owing to prepayments/ premature withdrawals.

Type of Currency	Impact on positions as at reporting date (200 basis points) Hike		Impact on positions as at reporting date (200 basis points) Hike	
	Decrease in profit before taxation	Decrease in profit before taxation	Decrease in profit before taxation	Decrease in profit before taxation

UNAUDITED PILLAR 3 DISCLOSURE 30 SEPTEMBER 2025

3.4. Operational Risk

Operational risk is the risk of loss resulting from inadequate or failed internal processes, human behaviour and systems, or from external events. Operational risk is inherent in each of the Bank's business activities. It includes risks such as fraud, physical damage, business interruption, transaction failures, legal and regulatory breaches, shariah non-compliance and employee health and safety hazards. Operational risk may result in direct financial loss as well as indirect financial losses to the Bank.

Operational risks are managed and controlled within the individual business lines. The RMC monitors the predetermined items to assess the trend of operational risks.

The Calculation of Value Equivalent to Operational Risk-weighted Assets

The calculation of value equivalent to operational risk-weighted assets used by the Bank is based on Business Indicator Component ("BIC"), for 31 March 2025 report and onwards, in accordance with Bank Negara Malaysia's Revised Capital Adequacy Framework (Operational Risk), issued date on 15 December 2023 and effective date on 1 January 2025.

The following tables present the minimum disclosure on regulatory capital requirements on operational risk.

30 September 2025	Risk-Weighted Assets	Minimum Capital
		Requirements at 8%
	RM'000	RM'000
Operational Risk	754,188	60,335

31 March 2025	Risk-Weighted Assets	Minimum Capital
		Requirements at 8%
	RM'000	RM'000
Operational Risk	720,047	57,604

UNAUDITED PILLAR 3 DISCLOSURE 30 SEPTEMBER 2025

4. Capital Adequacy

(a) The capital adequacy ratios of the Bank are as follows:

	30 September 2025	31 March 2025
Core capital ratio	27.272%	29.628%
Risk-weighted capital ratio	28.435%	30.789%

The capital adequacy ratios consist of capital base and risk-weighted assets derived from balances of the Bank. Beginning 1 January 2016, the minimum regulatory capital adequacy requirement has been increased to include capital requirement for capital conservation buffer and countercyclical capital buffer. As at 30 September 2025, the minimum regulatory capital adequacy and capital buffer requirement is 10.50% (March 2025: 10.50%) for the risk-weighted capital ratio.

UNAUDITED PILLAR 3 DISCLOSURE 30 SEPTEMBER 2025

6. The operations of Islamic Banking Window

6.5. Profit Sharing Investment Account

The disclosure is not applicable as the Islamic Banking business does not have any Profit Sharing Investment Account.

6.6. Shariah Governance

The Shariah Committee ("ShC") reports directly to the Board and has the responsibility to provide objective and sound advice to Islamic Banking Department ("IBD"), Management and the Board to ensure that, on all matters pertaining to Islamic Banking of the Bank, the Bank's aims and operations, business, affairs and activities are in compliance with Shariah.

The Shariah Governance structure adopted by the Bank is illustrated as follows:

SUMITOMO MITSUI BANKING CORPORATION MALAYSIA BERHAD

[Company No. 201001042446 (926374-U)]
(Incorporated in Malaysia)

UNAUDITED PILLAR 3 DISCLOSURE 30 SEPTEMBER 2025

6. The operations of Islamic Banking Window

6.6. Shariah Governance (continued)

As stated in the Shariah Committee Charter, the ShC is responsible for:

1. Performing an oversight role on Shariah matters related to business operations and activities of SMBCMY;
2. Providing a decision or advice to SMBCMY on the application of any rulings of the Shariah Advisory Council of BNM or standards on Shariah matters that are applicable to the operations, business, affairs and activities of SMBCMY;
3. Providing a decision or advice on matters which require a reference to be made to the Shariah Advisory Council of BNM;
4. Providing a decision or advice on the operations, business, affairs and activities of SMBCMY which may trigger a Shariah non-compliance event;
5. Deliberating and affirming a Shariah non-compliance finding by any other relevant functions in SMBCMY;
6. Endorsing or recommending a rectification measure to address a Shariah non-compliance event;
7. Establishing a robust methodology to guide its decision-making process and take into account relevant business and risk practices in arriving at a decision or advice; and
8. Immediately updating the BOD whenever the ShC has reason to believe that any Shariah issues or matter may affect the Shariah compliance of the Bank.

The ShC is supported on a functional basis by the Shariah Secretariat and the Shariah control functions namely Shariah Review, Shariah Risk Management and Shariah Audit.

The main duties and responsibilities of the Shariah Secretariat are to provide a secretariat function to the ShC, conducting research on Shariah issues and providing day-to-day Shariah advice to the Bank's internal parties based on the rulings of the BNM's SAC and the decisions or advice of the ShC.

Meanwhile, the Shariah Review function conducts regular assessments on the compliance of the Bank's operations, business, affairs and activities with Shariah requirements.

The Shariah Risk Management systematically assess, measures, monitors, and reports Shariah non-compliance risks in the operations, business, affairs and activities of the Bank.

6. The operations of Islamic Banking Window

6.6. Shariah Governance (continued)

Finally, the Shariah Audit provides an independent assessment of the adequacy and effectiveness of the Bank's internal control, risk management systems, and governance processes. The Shariah Audit scope covers the overall compliance of the Bank's operations, business, affairs and activities with Shariah.

In addition to the above, the Management of SMBCMY is responsible for providing adequate resources across every function involved in Shariah governance implementation to ensure end-to-end compliance with Shariah principles. The Management expects the various functions to be responsible for and to manage the implementation of any or all rulings of the BNM's SAC and they are complying with the said policy.

6.7. Shariah Non-Compliance Event

No actual Shariah non-compliance event had been detected for the financial period ended 30 September 2025. As such, no Shariah non-compliant income had been recorded for the year.
