Governance of liquidity risk management

The Global Policy provides the Branch with the directions to implement an effective process to manage money gap, liquidity contingency plan and supplementary liquidity.

In addition to the Global Policy, Statement of Liquidity Management Policy and Procedures for Monitoring Liquidity Maintenance Ratio have also been formulated and documented locally to identify, measure, monitor, report and manage liquidity risks and related liquidity and funding requirements under both normal and stressed conditions.

The liquidity and funding requirements are managed in a manner such that all local statutory requirements, internal limits and guidelines are properly monitored and controlled at an appropriate interval.

Structure and responsibilities for liquidity risk management

The Branch manages liquidity risks in an integrated manner. The information relating to the liquidity risk management is reported in monthly ALM Committee meeting. The local policies are reviewed and approved by the senior management and ALM Committee on an annual basis to address any changes in a statutory or reporting requirements where appropriate.

The Branch aims to maintain diversified and stable funding sources with an appropriate mix of liabilities including borrowing in the inter-bank market, customer deposits, issuance of negotiable certificates of deposits and inter-groups funding. Appropriate amount of high quality liquid assets are held in order to obtain funding from Repo market or through liquidation in stress events.
