(Company No. 926374-U) (Incorporated in Malaysia)

UNAUDITED PILLAR 3 DISCLOSURE 31 MARCH 2014

1. OVERVIEW

The Pillar 3 Disclosure for financial reporting beginning 1 January 2010 is introduced under the Bank Negara Malaysia's Risk-Weighted Capital Adequacy Framework ("RWCAF"), which is the equivalent to Basel II issued by the Basel Committee on Banking Supervision (BCBS). Basel II consists of 3 Pillars as follows:

- (a) Pillar 1 outlines the minimum amount of regulatory capital that banking institutions must hold against credit, market and operational risks assumed.
- (b) Pillar 2 focuses on strengthening the supervisory review process in developing more rigorous risk management framework and techniques. The purpose is for banking institutions to implement an effective and rigorous internal capital adequacy assessment process that commensurate with the risk profile and business plans of the bank.
- (c) Pillar 3 sets out the minimum disclosure requirements of information on the risk management practices and capital adequacy of banking institution, aimed to enhance comparability amongst banking institutions.

The approaches adopted by Sumitomo Mitsui Banking Corporation Malaysia Berhad (the Bank), are shown in table below:

Risk type	Approach adopted	Capital requirement assessment
Credit	Standardised Approach	Standard risk weights
Market	Standardised Approach	Standard risk weights
Operational	Basic Indicator Approach	Fixed percentage over average gross income for a fixed number of years

2. CAPITAL MANAGEMENT

The objective of the Bank's capital management policy is to maintain an adequate level of capital to support business growth strategies under an acceptable risk framework, and to meet its regulatory minimum. The Bank's capital management process includes analysis of the risk appetite and the capital requirement for the business growth and periodical monitoring of capital adequacy ratios.

(Company No. 926374-U) (Incorporated in Malaysia)

UNAUDITED PILLAR 3 DISCLOSURE 31 MARCH 2014

3. CAPITAL MANAGEMENT FRAMEWORK

The Bank has exposure to the following risks from its use of financial instruments:

- Credit risk
- Liquidity risk
- Market risk
- Operational risk

The Board of Directors has overall responsibility for the establishment and oversight of the Bank's risk management framework. The Board has established a Risk Management Committee (RMC), which is responsible for developing the risk management policies and assessing the implementation of risk management by the management of the Bank. The Bank has also established ALM/Risk Management Committee as one of the management committees to formulate the policies, procedures and risk limits and conduct periodical monitoring on risk exposure, risk portfolio and risk management activities.

4. CAPITAL ADEQUACY

(a) The capital adequacy ratios of the Bank are as follows:

	31 March 2014	31 March 2013
Core capital ratio	28.327%	42.925%
Risk-weighted capital ratio	28.733%	43.410%

The capital adequacy ratios consist of capital base and risk-weighted assets derived from balances of the Bank. The minimum regulatory capital adequacy requirement is 8.00% (March 2013: 8.00%) for the risk-weighted capital ratio.

(Company No. 926374-U) (Incorporated in Malaysia)

5. CAPITAL STRUCTURE

The components of Tier I and Tier II Capital of the Bank are as follows:

	31 March 2014	31 March 2013
<u>Tier-I Capital</u>		
Paid-up ordinary share capital	700,000	700,000
Accumulated profit / (losses)	28,542	14,792
Statutory Reserve	33,006	19,256
Available-for-sale reserve	(47)	(42)
	761,501	734,006
Less: Deferred tax assets	-	(1,882)
Total Tier-I Capital	761,501	732,124
<u>Tier-II Capital</u>		
Collective allowance for impairment	10,925	8,283
Total capital base	772,426	740,407

6. CREDIT RISK

Credit risk is the risk of a financial loss to the Bank if a customer or counterparty to a financial instrument fails to meet its contractual obligations. The Bank's exposure to credit risk arises principally from loans and advances to customers and placements with other banks.

Bank has established Credit Committee as one of the management committees with following objectives:

- (i) To discuss, formulate, review and implement the credit policy, procedures and manuals; and
- (ii) To review, analyse and approve credit proposals by ensuring effective credit limit control and monitoring.

(Company No. 926374-U) (Incorporated in Malaysia)

UNAUDITED PILLAR 3 DISCLOSURE 31 MARCH 2014

6. CREDIT RISK (CONTINUED)

The Bank has credit policies in place and the exposure to credit risk is monitored on an ongoing basis. Normally financial guarantees given by banks, shareholders or directors of customers are obtained, and credit evaluations are required to be performed on customers requiring credit.

As at the end of the reporting period, the maximum exposure to credit risk arising from loans, advances and receivables are represented by the carrying amounts of cash and short-term funds, deposits and placements with banks and other financial institutions, and loans, advances and financing as shown in the statement of financial position.

The Bank has taken reasonable steps to ensure that loans, advances and receivables that are neither past due nor impaired are stated at its realisable values. A significant portion of these loans, advances and receivables are regular customers that have been transacting with the Bank.

The ALM/Risk Management Committee conducts periodical monitoring on credit exposure trend, asset quality by obligor grading/impaired loans, portfolio concentration analysis and credit related limits control such as single counterparty exposure limit, large loan limit, exposure to connected parties, exposure to broad property sector and exposure for financing share/unit trust.

6. CREDIT RISK (CONTINUED)

Disclosure for portfolios under Standardised Approach

The Bank refers to the credit ratings assigned by credit rating agencies in its calculation of credit risk-weighted assets. The following are the External Credit Assessment Institutions ("ECAI") ratings used by the Bank and are recognised by BNM in the RWCAF:

- (a) Standard & Poor's Rating Services ("S & P")
- (b) Moody's Investors Service ("Moody's")
- (c) Fitch Ratings ("Fitch")
- (d) RAM Rating Services Berhad ("RAM")
- (e) Malaysian Rating Corporation Berhad ("MARC")
- (f) Rating and Investment Information, Inc. ("R&I")

The ECAI ratings accorded to the following counterparty exposure classes are used in the calculation of risk-weighted assets for capital adequacy purposes:

- (a) Sovereigns and Central Bank
- (b) Banking Institutions
- (c) Corporates

Rated and Unrated Counterparties

In general, the issue rating i.e. the rating specific to the credit exposure is used. When there is no specific rating available, the credit rating assigned to the issuer or counterparty of the particular credit exposure is used. In cases where an exposure has neither an issue or issuer rating, it is deemed as unrated.

Where a counterparty or an exposure is rated by more than one ECAI, all available external ratings of the counterparty will be captured and the following rules will be observed:

- Where 2 recognised external ratings are available, the lower rating is to be applied; or
- Where 3 or more recognised external ratings are available, the lower of the highest 2 ratings will be used for the capital adequacy calculation purposes.

7. MARKET RISK

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and other prices that will affect the Bank's financial position or cash flows. The objective of market risk management is to manage and control market risk exposures within the predetermined limits which are in line with the risk appetite of the Bank.

The Risk Management Committee approves the Bank's market risk appetite taking account of market volatility, the range of traded products and assets classes, the business volumes and transaction sizes. Market risk appetite has remained broadly stable in 2011 and to date.

The Risk Management Committee is responsible for the setting limit at a business level. The Risk Management Committee is also responsible for policies and other standards for the control of market risk and overseeing their effective implementation. These policies cover both trading and non-trading books of the Bank.

All permanent limits are approved by the Board/ the Risk Management Committee prior to implementation. Exceptions are escalated to the Board/the Risk Management Committee.

Interest rate risk management

Interest rate risk refers to the volatility in net interest incomes as a result of changes in the levels of interest rate and shifts in the composition of the assets and liabilities. Bank's ALM/Risk Management Committee regularly reviews the interest rate outlook, assessed the vulnerability of net interest income and develops strategies to mitigate interest rate risk.

Foreign exchange risk management

Foreign currency exchange risk arises from exchange rate movements, which affects the profit of the Bank from its foreign exchange open positions taken from the time to time. This risk is principally managed by setting predetermined limits on open foreign exchange positions against these limits and the setting and monitoring of cut-loss mechanisms. To mitigate this risk the Bank's foreign exchange positions with customers are normally hedged with counter deals in the market and the Bank does not keep any large open currency positions. The Bank enters into foreign exchange related derivatives, namely spot and forward contracts, as part of its strategies to manage foreign currency risk.

Foreign exchange risk	969	-	969	77
	3,961,806	3,919,860	74,439	5,955

8. LIQUIDITY RISK

Liquidity risk is the risk when the Bank fails to raise funds to meet the present or future demand of customers or counterparties at a reasonable cost. The potential liquidity risks of the Bank mainly include customers' premature and collective withdrawal, overdue payment of the debtors, mismatched asset-liability maturity structure and difficulties in realisation of assets.

(Company No. 926374-U) (Incorporated in Malaysia)

UNAUDITED PILLAR 3 DISCLOSURE 31 MARCH 2014

8. LIQUIDITY RISK (CONTINUED)

The primary tool used for monitoring liquidity is the Bank Negara Malaysia New Liquidity Framework ("NLF"). The NLF is further supplemented with the internal liquidity risk management policies set by the Board of Directors and incorporated in the Asset and Liability Management policies and procedures. These policies ensure that the liquidity surpluses are within the limit. The ALM/Risk Management Committee is responsible for the liquidity risk management. The liquidity risk management activities are carried out through a combination of Cash Flow Reports that can readily converted to cash, diversification of the funding base and proactive management of Bank's customer deposits.

9. OPERATIONAL RISK

Operational risk is the risk of loss resulting from inadequate or failed internal process, human behaviour and systems, or from external events. Operational risk is inherent in each of the Bank's business activities. These include breakdowns, error, business interruption and inappropriate behaviour of employees, and can potentially result in financial losses and other damage to the Bank.

Operational risks are managed and controlled within the individual business lines. The ALM/Risk Management Committees monitors the predetermined items to assess the trend of operational risks.
